Please provide a description of the methods used to solicit community input on community needs (attach additional pages if necessary):

Community input was obtained via this organization's strategic planning process and with the assistance of the North Country Health Consortium (NCHC), Androscoggin Valley Hospital (AVH), and Androscoggin Valley Community Partnership. Additional input was obtain from the groups mentioned above, and from individuals who participated via electronically distributed surveys, community forums and participant interviews.

NCHC staff was particularly helpful in this process, and developed a Community Health Needs Assessment (CHNA) that was based on the responses of nearly 300 local residents to a detailed needs survey (see attached). The Assessment gathered input from community members and the leaders of key organizations in the region about the health and wellness of area residents, and

asked respondents to comment on the programs and services needed to improve the well-being of individuals and families living in the North Country. In addition to these surveys results, secondary data was collected from the US Bureau of Census, the Behavioral Risk Factor Surveillance Survey, County Health Rankings, and the NH State Health Profile. This data was used for comparison purposes to determine relative need in relation to elsewhere in the state and country, and to help identify priority areas.
